

A Forerunner Advancing Innovation in Life Science

COMPANY PROFILE

2012
■
2022

Our Mission

We believe a good purpose makes a good business, and good businesses make a better world. Providing reliable products and services is our way to create a brighter future for all.

Our customers specialize in key areas such as basic biological research, disease diagnosis development, biopharmaceuticals and new treatments. Our job is to make it easier for them to improve public health and save lives.

As a young and energetic company, we give 120% in everything we do. We are proud of who we are and what we believe in. We are proud of the differences we made to people's lives, and to the world.

We are Vazyme.

Who are we

Inno**V**Ation in En**ZYME** Technology

Our Vision

Our vision is to lead in biotechnology by driving innovation relentlessly, pursuing the highest standards in quality of products and services, and creating value for our customers.

Our Responsibility

University cooperation
Talents are a key driver of research and development. Committed to empowering healthy living with technical innovations, we team up with universities to build a platform for academic exchanges, resource sharing and talent development.

Public health
Science and Technology Make a Healthier Life is not just a slogan; it is a commitment to our society and the whole world. To help humans overcome epidemics, tumors, and autoimmune diseases, we played an important role in the fight against the African swine flu and COVID-19. We are among the first to roll out COVID-19 testing solutions. By June 2021, we provided detection kit manufacturers with key raw materials that could be used for about 500 million tests. So far, our testing kits have made their way to more than 60 countries.

Our Culture

- We care for our customers

We thrive on innovation
- We strive for excellence

We own our company
- We live by our principles

We achieve as a team

Our History

.....**2012**

Found
Vazyme was established including a number of biomolecular research reagent product lines with independent intellectual property rights.

.....**2015**

Go Global
The International Business Department was set up with the belief of becoming the professional supplier of In Vitro Diagnostic Solutions worldwide.

.....**2016**

IVD Business
Vazyme Medical Technology CO., LTD was established, which aimed to deploy IVD testing reagents and instruments.

.....**2019**

Biomedical Business
Several key projects of Vazyme Medical passed the External Quality Assessment (EQA) of the National Center for Clinical Laboratories with full marks.

.....**2020**

Response to COVID-19
COVID-19 Solutions with high detection sensitivity were developed by Vazyme professional team and certified by more and more regions from all over the world.

.....**2021**

Listed on SSE
Vazyme went public on the star market of the Shanghai Stock Exchange under the stock code 688105.

.....**FUTURE**

Do you Know

Innovation is our DNA

3000+ Employees

make up our global research and development operations with scientists, experts, bio-technicians, medical specialists, engineers, and software developers.

10 Years

We have kept devoting ourselves as a committed frontrunner in technology innovation. We are a R&D focused innovative biotechnology company with both capabilities in developing in-house upstream technologies and manufacturing end products.

\$80 million

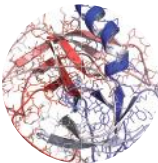

has been invested in R&D projects, people and equipment for these years. Now we have 25,000 m² R&D center and company headquarter, 64,000 m² biological reagents and raw materials production base and IVD production line with GMP workshop.

2000+ Papers

have been published by Vazyme in top academic journals worldwide, including more than 260 in CNS (stands for Cell, Nature, Science) and its sub-journals, as of Nov 2021.

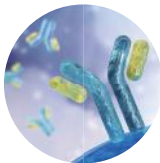

4 Key Technology Platforms

which are independently established by ourselves are the foundation for our products, solutions, and services.

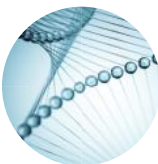

Protein Directed Modification & Evolution Platform

For high-end products: Improved products performance via leading-edge technology platform

High Performance Antibody Discovery Platform (Based on Single B Cell)

For difficult and scarce products: Enhance antibody screening efficiency and shorten development cycle

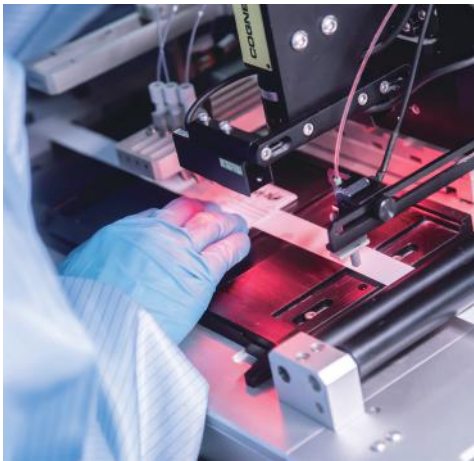

Multi-system Recombinant Protein Preparation Platform

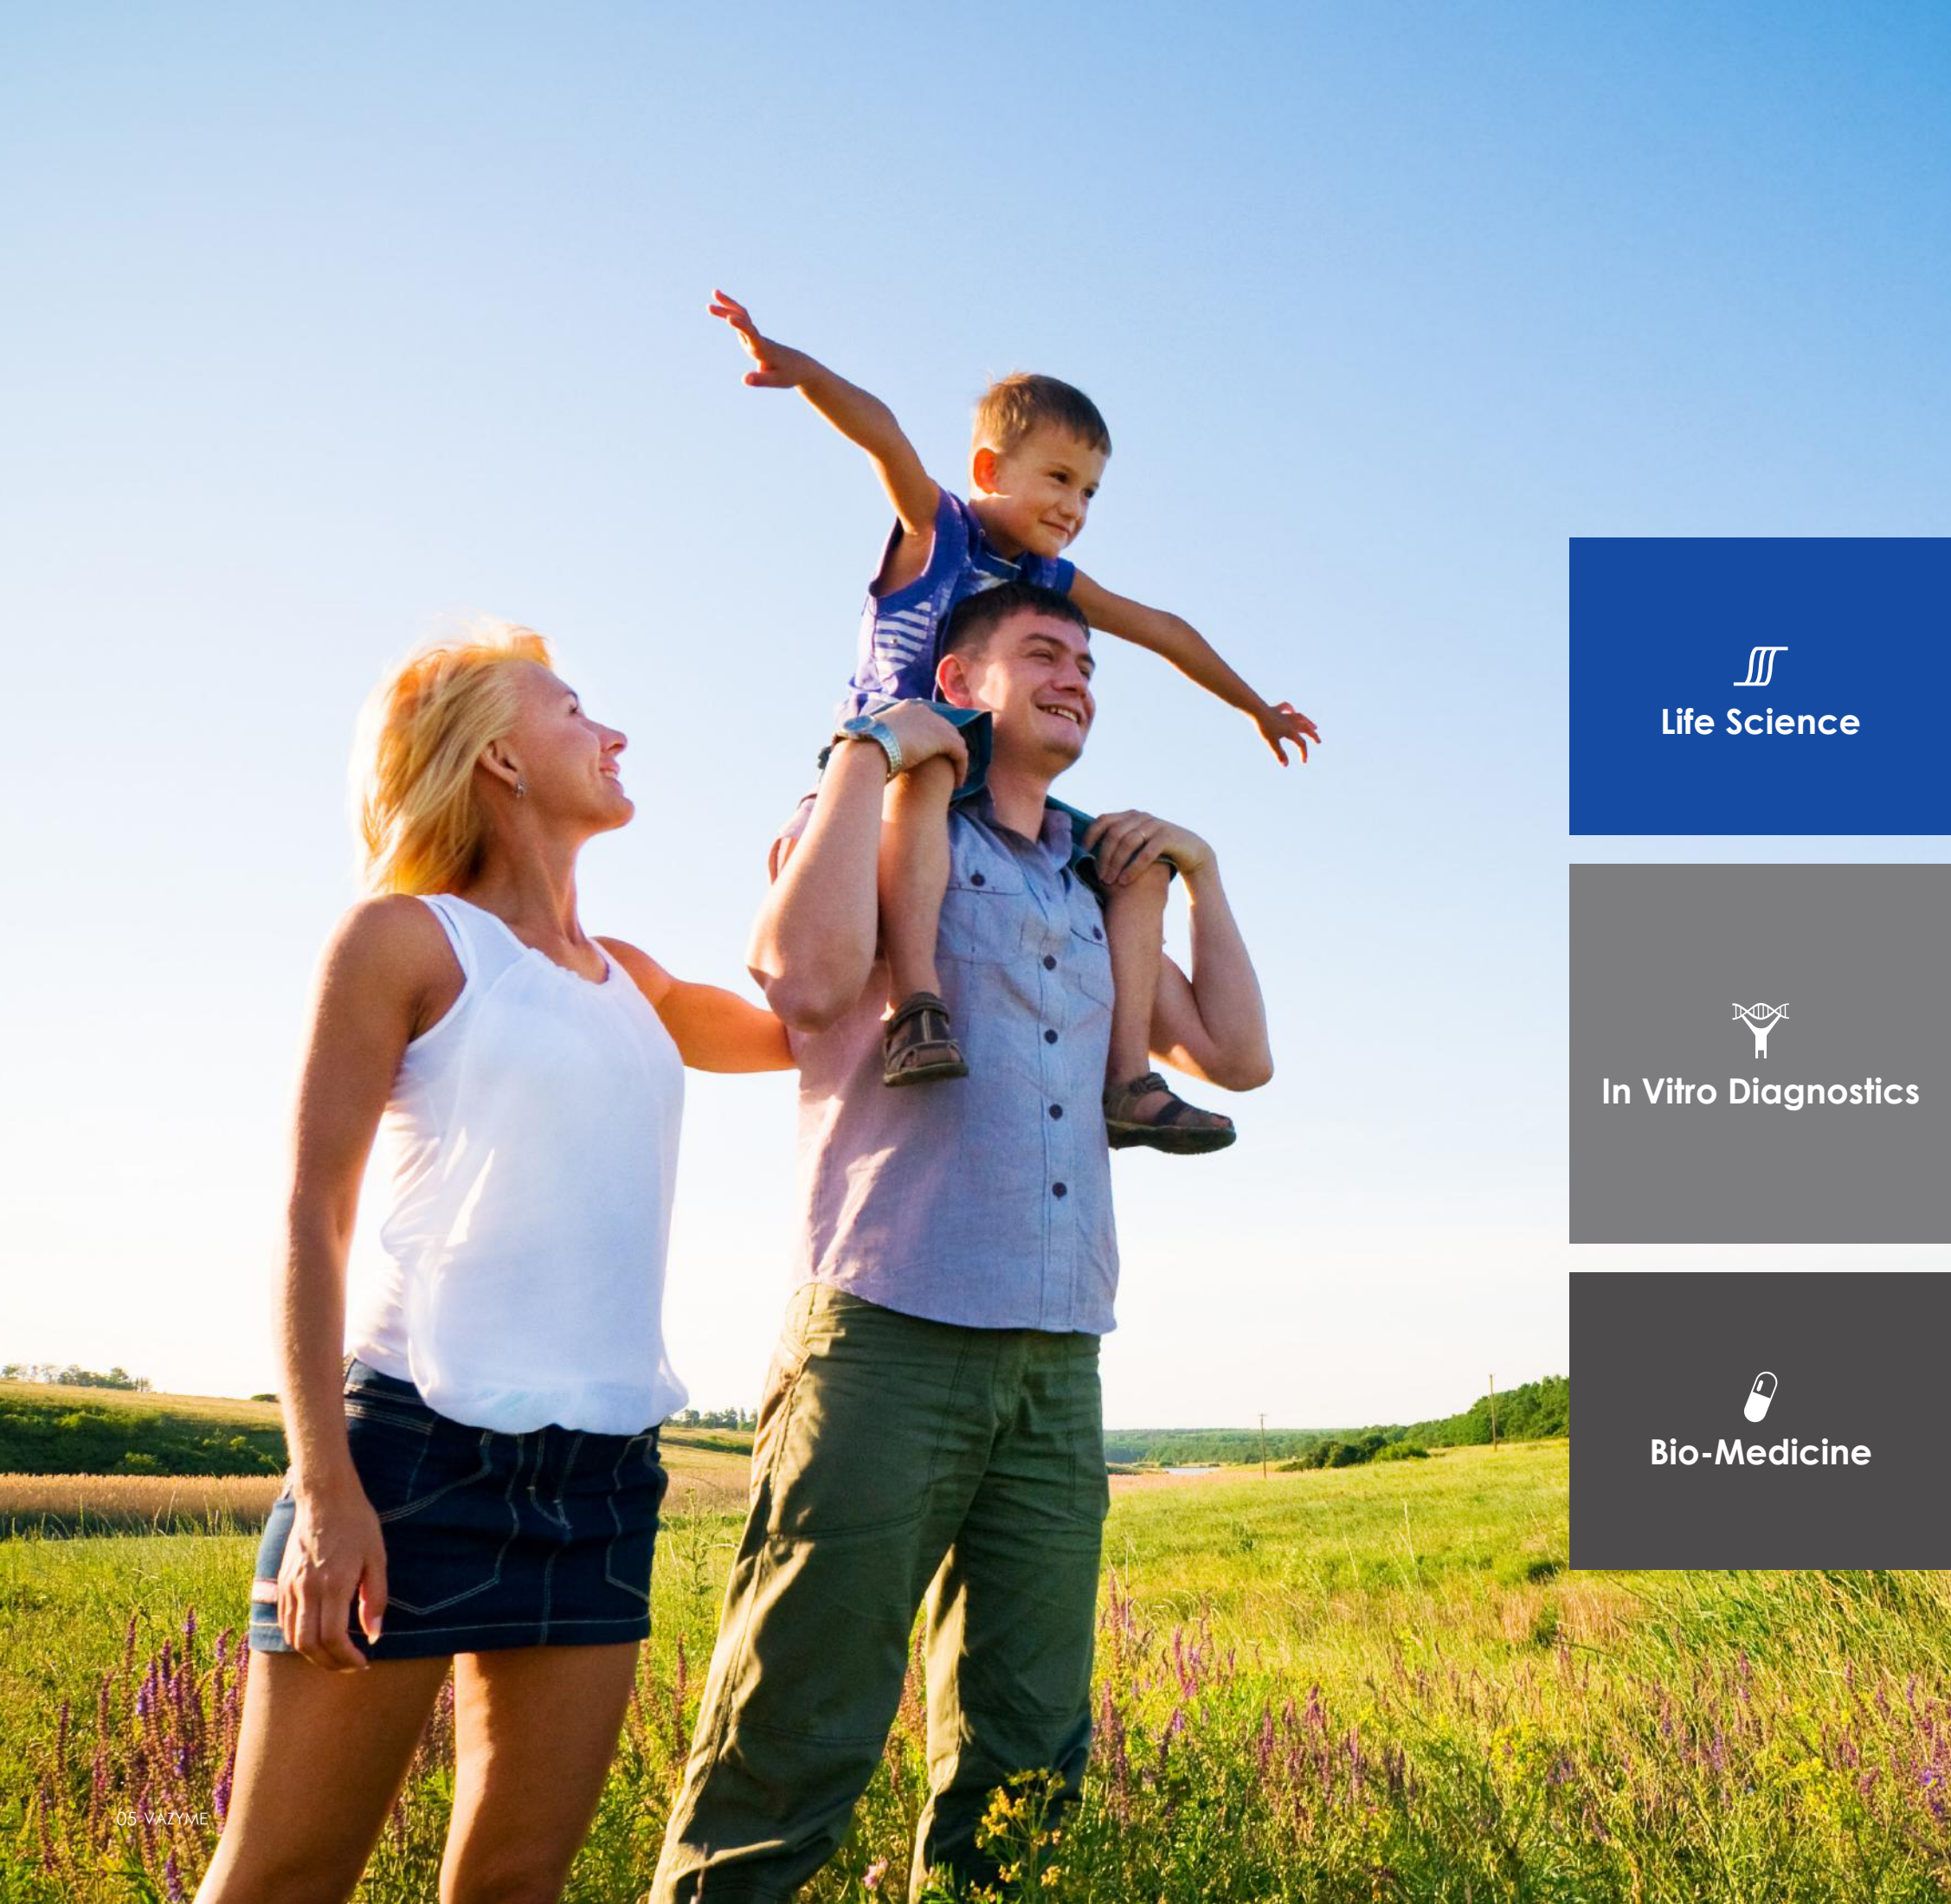

For safer supply chain: Increase the unit production capacity to world leading level

Quantum Dot Modified Coupling and Multi-index Joint Inspection Technology Platform

For higher efficiency with lower cost: Multiple test results for one sample in one step

What we do

Life Science

Professional products and solutions supplier in life science

Scientific Research Reagents
NGS Library Prep Kits
Molecular Diagnostics Solutions
Animal Detection Solutions

In Vitro Diagnostics

Eight series of proprietary POCT solutions including diagnostic reagents, related control materials, and instruments:

Cardiovascular	Autoimmunity
Cerebrovascular Diseases	Renal Functions
Inflammation	Chronic Disease Management
Prepotency	Respiratory Diseases
Gastric Functions	

Bio-Medicine

Better solutions for better drugs

New Medicine Development Reagents
Vaccine Evaluation Reagents
Raw Materials for Vaccine Production

QC Management

We persevere that creating value for customers are the key to our business. That's why we pursuing the highest standards in quality of products.

Certificates

We constantly bring our products, solutions and services to more markets and strictly comply with the regulation of each country and region.

Global Network

In more than 60 countries and regions worldwide that's where we are present, making sure we are close to our customers to provide our products, solutions, and services locally. We have our first branch in Indonesia, offices in Hong Kong and the United States, and multiple overseas warehouses to ensure worldwide logistics.

*Above is only part of countries and regions.

- NA:** USA, Canada
- LA:** Brazil, Peru, Colombia, Mexico, Jamaica
- EU:** Germany, UK, France, Italy, Spain, Portugal, Denmark, Belgium, Switzerland, Greece, Russia, Hungary, Poland, Ireland, Turkey
- MEA:** Egypt, South Africa, Nigeria, Tunisia, Uganda
- APAC:** Indonesia, Singapore, Philippines, Malaysia, Thailand, India, Korea, Japan, Australia, New Zealand, Israel, Uzbekistan, Pakistan, etc.

Response to COVID-19

Since the outbreak of COVID-19, we have contributed to R&D for the response, stay connected for support, and provided solutions in this time of need.

As of Q2 2021, more than **400 million** nucleic acid detection raw materials have been provided to over **60 countries** and regions including the European Union and Southeast Asia, as well as **42 million** antigen/antibody test kits to help preventing and controlling the spread of COVID-19.

Reverse Transcriptase

HiScript® II Reverse Transcriptase Murine Rnase Inhibitor Heat-labile UDG

DNA Polymerase

Taq HS DNA Polymerase for qPCR buffer+dNTP

NGS

VAHTS® RNA Multi-PCR Library Prep Kit

Antigen Detection Solution

2019-nCoV IgG / IgM Detection Kit SARS-CoV-2 Antigen Detection Kit SARS-CoV-2 Antigen Detection Kit For Self-Testing SARS-CoV-2 & Flu A/B Virus Ag Detection Kit

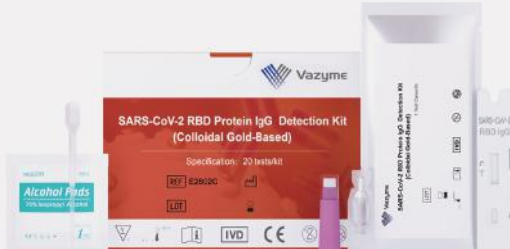

Nucleic Acid Detection Solution

Sample Collection Extraction Detection

Virus Sample Stabilizer&Swabs Automatic Nucleic Acids Extraction Instrument +DNA/RNA Extraction Kit Real-Time Quantitative Thermal Cycler +2019-nCoV Triplex RT-qPCR Detection Kit

Vaccine Evaluation Solution

Anti-SARS-CoV-2 Neutralizing Antibody ELISA Kit SARS-CoV-2 RBD Protein IgG Detection Kit

Since the founding in 2012, we have been dedicated to our mission "Science and Technology Make a Healthier Life" to hold ourselves to the highest standards of ethics, accountability and professionalism. As a R&D based company, our global research and development operations make sure we could bring our products, solutions, and services locally to our customers.

We will, as always, walk alongside our partners around the globe, step up our efforts to build on these strengths to help fight severe diseases.

Tomorrow is another day.
